ABSTRACT

The present invention provides a selective suppressor of the IgE production comprising a compound which suppresses the IgE production in a process from a differentiation of a mature B cell into an antibody-producing cell to the production of an antibody and which does not suppress or weakly suppresses the production of IgG, IgM and/or IgA which are produced at the same time, a compound of the formula (I):

$$R^{1}$$
 R^{2}
 R^{3}
 R^{6}
 R^{7}
 R^{10}
 R^{11}
 $X-Y$
 R^{1}
 R^{2}
 R^{3}
 R^{6}
 R^{7}
 R^{10}
 R^{11}
 R^{11

wherein R^1 - R^{13} are hydrogen, halogen, lower alkyl, lower alkoxy or the like, X is -O-, - CH_2 -, -NR¹⁴- or -S(O)p- and Y is lower alkyl, lower alkenyl or the like, a process for producing the same and a pharmaceutical composition comprising the same.
